

## 12\_If\_Else\_elif\_Block

Following indentation represents the block or group of statements under a given condition. so maintaining the indentation for all the code which should be part of a given statement is must.

```
acquired_marks = 24
pass_marks=35

if acquired_marks > pass_marks:
    print("Pass")
else:
    print("Fail")
```

[49] ✓ 0.0s

... Fail

```
acquired_marks = 44
pass_marks=35

if acquired_marks > pass_marks:
    print("Pass")
else:
    print("Fail")
```

[50] ✓ 0.0s

... Pass

```
acquired_marks = 65

if acquired_marks >= 90:
    print("Topper")
elif acquired_marks >= 80 and acquired_marks < 90:
    print("Second Class")
elif acquired_marks >= 70 and acquired_marks < 80:
    print("Third Class")
elif acquired_marks >= 60 and acquired_marks < 70:
    print("Fourth Class")
elif acquired_marks >= 50 and acquired_marks < 60:
    print("Fifth Class")
elif acquired_marks >= 35 and acquired_marks < 50:
    print("Just Passed")
else:
    print("Fail")
```

[51] ✓ 0.0s

... Fourth Class

You can use **Nested if else conditions** as well but not recommended if they are crossing more than 3 such nested loops

```
given_number = 25

if given_number > 0:
    if given_number%2 == 0:
        print("Even Number")
    else:
        print("Odd Number")
elif given_number < 0:
    print("Negative Number")
else:
    print("Given number is zero")
```

[55] ✓ 0.0s

... Odd Number
